SUBMITTED BY

ROHIT SINGHAL

GLA University , Mathura

Acknowledgement

I have taken efforts in this project. However, it would not have been possible without the kind support and help of many individuals and organizations. I would like to extend my sincere thanks to all of them.

I am highly indebted to Netcamp Solutions Pvt. Ltd. For their guidance and constant supervision as well as for providing necessary information regarding the project and also for their support in completing the project.

I would like to express my gratitude toward Mr. Santu Purkait, Director: Netcamp Solutions Pvt. Ltd. For their kind co-operation and encouragement which help me in completion of this project.

I would like to express my special gratitude and thanks to organization persons for giving me such attention and time.

My thanks and appreciations also go to my colleagues in developing the project and people who have willingly helped me out with their abilities.

Name: Rohit Singhal
College ID: 191500676
College: GLA University , Mathura
Date: 30 June 2021 to 31 August 2021
Signature: 

Netcamp Solutions Private Limited

an ISO 9001:2015 Company

Certificate

*This is to certify that, **Rohit Singhal**, a student of program, **Android with Java Program** has successfully completed a project on Network Management under the guidance of **Mr. Santu Purkait** during the Dates: 30 June- 31 August,2021 by Netcamp Solutions Private Limited.*

Realtime Database

The screenshot shows the Firebase Realtime Database console. The left sidebar contains the Firebase logo and navigation links: Project Overview, Build (Authentication, Firestore Database, Realtime Database, Storage, Hosting, Functions, Machine Learning), Release & Monitor, Analytics, Engage, Extensions, and Spark. The main area is titled 'Realtime Database' and has tabs for Data, Rules, Backups, and Usage. A warning banner at the top states: 'Protect your Realtime Database resources from abuse, such as billing fraud or phishing. Configure App Check'. The 'Data' tab is active, displaying a JSON tree structure for the 'users' node. The tree shows three user objects with their respective IDs and details.
